80 Women Hackers

19-20th February, 2016

@UPenn, Philadelphia

Femmehacks is an all-woman, beginner friendly hackathon for female students interested in tech. It will take place in the University of Pennsylvania on the weekend of February 20th, 2016. Students will hack on web, mobile and hardware for this hackathon to create products from scratch over the weekend. Our participants have pursued top CS programs at universities and college around Philadelphia like the University of Pennsylvania, Princeton, Drexel, Rutgers, Villanova, Temple, Bryn Mawr, Haverford and Swarthmore.

who is organizing this event?

The Women in Computer Science (WiCS) chapter @UPenn is organizing Femmehacks. Our organization aims to encourage collegiate women achieve their full potential in a computing related field. We regularly host corporate tech talks, social events, company field trips, mentorship events and career panels for our constituents.

Let us know which tier you would like to sponsor us for.

why sponsor?

Save the Ratio

An NPR report in 2013 stated that around 20% of all US computer programmers are female.

With a very low retention rate of females in tech, our hackathon hopes to spark and support a passion for technical projects amongst women. Female students often do not feel like they belong in computing due to a severe gender gap within classes, clubs and even HACKATHONS! Sponsors like you will help support talented women hackers who are passionate about building technology.

Recruit the smartest women

Engage with the students who will become the future engineers, product managers, and designers at your company. We attract some of the smartest college technical talent at the same university that sparked the hackathon movement.

See your technology in action

Your technology and APIs will be live tested by our hackers. Considering that our hackers are trying to create new technologies, they will create edge cases testing the boundaries of your products. If you are a sponsor, around 80 developers will use your APIs providing live feedback for your product.

Brand Recognition

Use this hackathon to reach out to early adopters who are likely to use and develop your technology in the future. Tell our participants about your company and products. PS - Bring swag! Hackers love stickers, water bottles, pens, journals, etc.
